Committee 5 Nursing and Health Professions
Approved Recommendations

1. Recommends aligning the internal approval process (Faculty Senate) and specific accreditations (Board of Nursing, Accreditation Commission for Education in Nursing [ACEN], and Commission on Dental Accreditation [CODA]) according to timeline for completion of consolidation and implementation of any revised curriculum(s) scheduled to begin fall 2016.

2. Recommends transitioning applicable career degree programs to transfer degree programs.

3. Recommends considering changing the AS concentration of Respiratory Therapy to pre-Respiratory Therapy, since in its current form does not allow a student to sit for the certification exam which some AS programs do.
