Committee 36-8 Academic Technology/Center for Instructional Innovation Approved Recommendations

1. Recommends that Georgia State University form a partnership with Information Technology Services to define and develop data reporting strategies for the learning management system that meet the needs of the new institution.

2. Recommends that the BrightSpace by D2L consolidation follow the A+B=C model on an existing BrightSpace by D2L Instance.

3. Recommends that each campus retain its classroom, learning space and collaboration space technology and move towards a cohesive user experience across all learning spaces through the annual refresh process.

4. Recommends that event services at the combined institution remain supported with the same methods as is currently offered.

5. Recommends continuing to offer the current training and professional development portfolio of both institutions until offerings can be reviewed based on viability, needs analysis, and a subsequent prioritization resulting from the consolidation.

6. Recommends that open-access, centrally managed labs at both institutions, such as the mediaSPOT, jagSPOT and Digital Aquarium continue to provide services such as equipment checkout and training to students until services can be reviewed based on the needs of the combined institution.

7. Recommends consolidating all similar existing enterprise licensing related to learning technologies to one agreement per vendor.

8. Recommends that digital signage services maintain its current management, configuration, and support structure until the needs of the new University have been determined.
